

Generate me a prompt that when given to AI models generate me a worksheet based on the following problems. make sure you prompt in a way that the AI makes the worksheet in text format and the places where it needs to put images, it puts the description of the image in square brackets .Make sure the prompt include the fact that only 10 to 20 problems should generate per prompt. And no need to provide with answers...
Make some problems based on "seasons". like :
1.what type of cloth do you wear in summer season, with images of different cloth next to the question.
2. which season is depicted in the figure, with an image of raining etc

Certainly! Here's a prompt to generate a worksheet with problems based on seasons, including images and descriptions:

"Generate an educational worksheet for [grade level or age group] focusing on seasons. Include a maximum of 10 to 20 problems, each consisting of a question related to seasons, accompanied by images of relevant items or scenes. Do not include answers.

For each problem, provide the following format:

Problem [Problem Number]:

Examine the images and answer the questions related to seasons.

1. What type of clothing do you wear in the summer season?
 - [Image of summer clothing items]
2. Which season is depicted in the figure?
 - [Image of a rainy scene]
3. What fruits are commonly available in the autumn season?
 - [Image of autumn fruits]
4. Identify the season shown in the picture.
 - [Image of snow-covered landscape]
5. Which season brings colorful leaves to the trees?
 - [Image of trees with colorful leaves]
6. Which season is associated with blooming flowers?
 - [Image of blooming flowers]
7. What activities do people often do in the winter season?
 - [Image of winter activities]
8. Name the season that marks the beginning of the school year.
 - [Image of school-related items]

Please ensure that the worksheet problems are suitable for the intended grade level or age group and cover various aspects of seasons. Use the provided descriptions of images or scenes in square brackets for visual engagement."

When you provide this prompt to AI models, they should generate a worksheet with problems related to seasons, including images and descriptions, following the provided format. You can specify the number of problems you'd like within the range of 10 to 20, and the AI will generate the worksheet accordingly.
