Here's a prompt to generate a worksheet that covers various topics related to vocabulary, money, finance, and more:

"Generate an educational worksheet covering diverse topics for [grade level or age group]. Each problem should have a brief description of an image or object in square brackets for visual engagement:

1. Wants and Needs - Vocabulary: Match the vocabulary words to their meanings.
  - Example: [Image of a shopping cart], [Image of a house]
2. Money - Finance Vocabulary: Fill in the blanks with the correct finance-related words.
  - Example: A bank is a place where you can [Image of coins] and [Image of bills].
3. Money - Uses of Money: Write down three different ways you can use money.
  - Example: [Image of a toy], [Image of a book], [Image of a bus ticket]
4. Money - Design Your Money: Draw your own currency and give it a name.
  - Example: [Image of a blank money template]
5. Money - Comparing Costs: Compare the costs of two items and circle the cheaper one.
  - Example: [Image of item A], [Image of item B]

Please continue with similar problems for the remaining numbers, ensuring they cover a variety of topics and are suitable for [grade level or age group]. Use the provided descriptions of images or objects in square brackets where appropriate."

When you provide this prompt to AI models, they should generate a diverse worksheet covering the specified topics, with descriptions of images or objects in square brackets for visual engagement. You can extend the list of problems or tailor them to your specific educational needs.
