

Generate me a prompt that when given to AI models generate me a worksheet based on the following problems. make sure you prompt in a way that the AI makes the worksheet in text format and the places where it needs to put images, it puts the description of the image in square brackets .Make sure the prompt include the fact that only 10 to 20 problems hould generate per prompt. And no need to provide with answers..:

a problem where there are many images of daily items like scarf, boots, pen, bag , tiffin box, water bottle etc.

Beside each image their is the price tag of each item.

You are given a particular amount of money.

problems like Can you buy the scarf?

Yes

No

2. Can you buy the boots and hat?

Yes

No

3. Can you buy the jacket and sledge?

Yes

No

4. Can you buy the mittens?

Yes

No

Certainly! Here's a prompt to generate a worksheet with shopping-related problems involving images and price tags for daily items:

"Generate an educational worksheet with shopping-related problems for [grade level or age group]. Include a maximum of 10 to 20 problems, each consisting of images of daily items like a scarf, boots, pen, bag, tiffin box, water bottle, etc., with a price tag beside each item. Do not include answers.

For each problem, provide the following format:

**Problem [Problem Number]:**

You are given a particular amount of money. Look at the images and price tags of the items.

Determine if you can buy the specified items with the given amount of money.

- [Image of a scarf] - Price: \$10
- [Image of boots] - Price: \$15
- [Image of a pen] - Price: \$2
- [Image of a bag] - Price: \$8
- [Image of a tiffin box] - Price: \$7
- [Image of a water bottle] - Price: \$3

**Questions:**

1. Can you buy the scarf?
  - Yes
  - No
2. Can you buy the boots and hat?
  - Yes
  - No
3. Can you buy the jacket and sledge?
  - Yes
  - No
4. Can you buy the mittens?
  - Yes
  - No

Please ensure that the worksheet problems are suitable for the intended grade level or age group and cover shopping-related concepts. Use the provided descriptions of images or objects in square brackets for visual engagement."

When you provide this prompt to AI models, they should generate a worksheet with shopping-related problems, including images and price tags, following the provided format. You can specify the number of problems you'd like within the range of 10 to 20, and the AI will generate the worksheet accordingly.
