Generate me a prompt that when given to AI models generate me a worksheet based on the following problems. make sure you prompt in a way that the AI makes the worksheet in text format and the places where it needs to put images, it puts the description of the image in square brackets.:
English-Phonics
8-9 YEARS
1. Beginning Sounds 11. Rhyming
2. Rhyming words 12. Begining sound
3. Ending sound 13. Rhyming words
4. Phonics 14. Begining sound
5. Sh beginning sound 15. Beginning sound
6. Ending Sounds 16. Begining sound
7. Begining sound 17. Ending sound
8. Begining sound 18. Homophone
9. Vowels 19. Beginning SH
10. Homophones 20. Ryhming words

Certainly, here's a prompt to generate a worksheet for English phonics activities for 8-9-year-olds:

"Generate a phonics worksheet for 8-9-year-olds. Include the following problems and provide a brief description of an image or object in square brackets where appropriate:

1. Beginning Sounds: Write the beginning sound of the following words.
   - Example: Cat [Image of a cat]
2. Rhyming Words: Identify and write two words that rhyme with 'cat.'
   - Example: [Image of a hat], [Image of a mat]
3. Ending Sound: Write the ending sound of the word 'dog.'
   - Example: [Image of a dog]
4. Phonics: Match the pictures with their beginning sounds.
   - Example: [Image of a cat], [Image of a cake], [Image of a dog]
5. SH Beginning Sound: Write the beginning sound of the word 'ship.'
   - Example: [Image of a ship]

Please continue with similar phonics problems for the remaining numbers, ensuring they are visually engaging and suitable for an educational worksheet format. Use the provided descriptions of images or objects in square brackets where appropriate."

When you provide this prompt to AI models, they should generate a phonics worksheet with the specified activities and include descriptions of images or objects in square brackets for visual engagement. You can extend the list of phonics activities as needed, and the AI will generate the worksheet accordingly.
